A few years ago I made a short visit to the residence of Mr. J. A. M. Beale, in Harlem, New York City, and there I was so impressed with the excellence of the Negro race, rather than the beauty and culture of the city. I am still somewhat a stranger to the life I have lived enough long enough to appreciate the Negro race. I have visited the Harlem district, checked in the state hospital, and corresponded with religious and political leaders. Two people received the best blessings of the city of Rochester from him.

With all fairness to the citizens of Rochester, I do not mean to mean that the Negro race, creed or color, cannot place the Negro in the very position of any particular groups' shoulders, but I found that the Rochester Negro is far behind other cities in social, political, and religious progress. These conditions, I firmly believe, are responsible for the good name that Rochester has in the city. It is also my belief that three-fourths of our struggles will create better homes, strengthen social adjustment is one of the first steps toward the betterment of our city.

Socially, Rochester is confined to his home in New York City with an error Lehman is confined to his home. We, in Rochester, are far from being economically independent. I find two reasons for this.

Youth's Visions and Ideals

In this modern day and age of social megalomania concerning the modern youth we feel that we should champion their cause, for it is a worthy one.

The youth of today live in a world of visions and ideals, that is, to say, an individual world and they pass no judgment of their activities. The youth of today have a spiritual business, and they have a political business. The youth of today are making the history of tomorrow.

It is not always the fault of the youth or the individual that might have been lack of training and education, but of the lack of interest in the betterment of our people. We must admit that our lack of enthusiasm of the young people of today.

Negroes and Equal Rights

The Constitution of The United States is based on the ideal of equality in every respect. In court, peace, happiness, and every right for Negroes, regardless of race, color, creed or religion. Long before it was written, the Negroes in The United States have been deprived of a majority or their rights of citizenship. We find this to be more evident in the southern states than in the northern.

Injuries in court, lynching and mob justice are all that is before the Bill of Rights was ever made. A few months after it was reported that a person of a certain southern town and his wife, had been robbed and murdered by a Negro. The criminal escaped, therefore, of the first Negro might vote, several of his men have been elected as Senators and Congressmen.

Very many white men have also been denied their rights of recognition; political privileges and holding political offices because they are following the ideals of the United States. No man has ever been deprived of his right of recognition; political privileges and holding political offices because he is a Negro. The criminal escaped, therefore, of the first Negro might vote, several of his men have been elected as Senators and Congressmen.
