Wonders of Water

Self-Guided Exploration

Enjoy this bin of self-guided activities to enhance your Museum visit! Included in this bin are materials to:

- Start your experience by learning about creation stories from all around the world, as well as from local indigenous peoples. The theme? Water of course!
- Dive in and discover what it's like to take part in the discovery of shipwrecks and artifacts by learning more about Bathymetry and other measurements of oceans and lakes.
- Investigate changes in our local waterways by looking at real life data, and uncover ways to advocate for positive change in our environment.

We hope you enjoy this free additional content! Check out the links in the back of the reference Documents for even more resources.

Please Contact Eron Damercy at x376` or edamercy@rmsc.org to replace or refill materials in this bin.
